- **Revamped Hours of Rest for the MOBILE APP**

!

Click [here](#) and contact us to know more about the update!

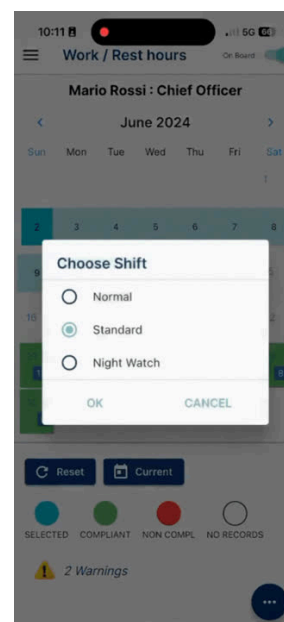

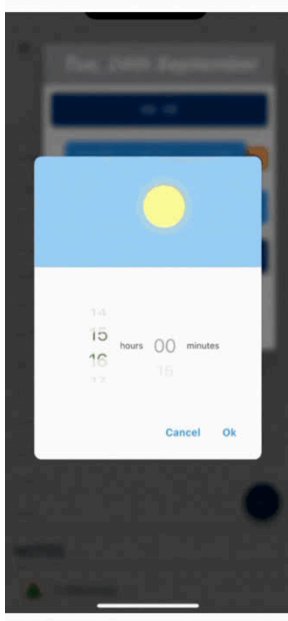

A completely new Calendar view for the Hours of Rest

The old list has now been replaced by a more easy to read calendar with a legend that will make it faster to insert one or more shifts and will give you a clear overview of any non conformities.

Single click on the date to insert a schedule

To insert a schedule you can click on one day and select the option to insert a Default Schedule or create a Custom one. And if you want to insert a default schedule for more days simply click on the first day and on the last, all days in between will be automatically selected!

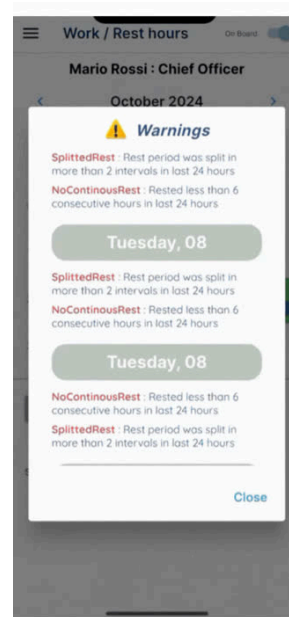

Long press on a Date to enter the Day view
If you want to enter the Day view, you will have to long press on the Date in question. Here you can create a new shift or edit an existing one, from the popup window or with drag&drop and enter Notes.

Easy monitoring of NonConformities

From the Calendar view you will be able to check all your Warnings of the month, if you have any.
And if you want to add a comment or justification to a warning, you will be able to do so from the Day view.
